[Docket No. 910235-1173]

Agency: Patent and Trademark Office, Commerce.
Action: Notice.

Notice of Termination of Status of International Depository Authority under Budapest Treaty

Summary: Notice is hereby given that In Vitro International, Inc.'s status as an international depository is terminated effective Sept. 25, 1991.
Address: Questions should be submitted to H. Dieter Hoinkes, Office of Legislation and International Affairs, Box 4, Patent and Trademark Office, Washington, D.C. 20231.
For Further Information Contact: H. Dieter Hoinkes, Office of Legislation and International Affairs, (703) 557-3065.
Supplementary Information: Since Nov. 30, 1983, In Vitro International, Inc. (IVI) of Linthicum, Maryland, has been recognized as an international depository authority under the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure. The Patent and Trademark Office has received a letter from Dr. Rex A. D'Agostino, President of IVI, dated May 24, 1991, stating that IVI can no longer continue to perform its functions as an international depository authority under the Budapest Treaty.

By letter dated June 25, 1991, the Patent and Trademark Office has notified the Director General of the World Intellectual Property Organization that "the United States withdraws its declaration of assurances made on behalf of IVI on Sept. 9, 1983". As a consequence, the termination of the status of IVI as an international depository authority takes effect on Sept. 25, 1991.

All deposits stored with IVI under the Budapest Treaty were transferred on June 20, 1991, to a substitute authority, which is the American Type Culture Collection (ATCC), 12301 Parklawn Dr., Rockville, Md., 20852, (Telephone No. (301) 881-2600). All mail or other communications addressed to IVI regarding those deposits, including all files and other relevant information, have also been transferred to ATCC. In its capacity as a substitute authority, ATCC has agreed to store all deposits transferred from IVI for an initial period of not less than three months from July 5, 1991, the date of first notice in the Federal Register of IVI's termination as an international depository authority. Patent owners and applicants who wish to preserve their date of original deposit must contact ATCC by Oct. 5, 1991, to make arrangements to pay ATCC's fee for continued maintenance and storage of their deposits past the initial storage period. ATCC will not accept responsibility for continued storage of deposits in respect of which depositors have failed to make appropriate arrangements by Oct. 5, 1991.

For further information, contact H. Dieter Hoinkes, Office of Legislation and International Affairs, Box 4, Patent and Trademark Office, Washington, D.C. 20231; telephone (703) 557-3065.

Drawings

The following supplements the notice published at 1121 *Official Gazette* 54 (Dec. 25, 1990) concerning drawings.

37 CFR 1.84(j), states:

(j) Arrangement of views. All views on the same sheet should stand in the same direction and, if possible, stand so that they can be read with the sheet held in an upright position. If views longer than the width of the sheet are necessary for the clearest illustration of the invention, the sheet may be turned on its side so that the top of the sheet with the appropriate top margin to be used as the heading space is on the right-hand side. One figure must not be placed upon another or within the outline of another."

Words must appear in a horizontal, left-to-right fashion when the page is either upright or turned so that the top becomes the right side. This will allow for drawings to be viewed on a monitor in an automated search system so that words/numbers appear in either an upright position or when rotated 90° to the right.

The previous notice stated that Example A was improper because the words "Y-AXIS" do not meet the rule's requirement. Example B was used to demonstrate one way to meet the rule's requirement. Examples A and B are reprinted below for your convenience.

New examples that meet the rule's requirement are provided in Examples C, D, and E, below. The words "heading space" are included for orientation purposes.

It has been brought to the Office's attention that Example B does not conform to scientific convention, but Example A does conform to scientific convention.

The Office has reconsidered its interpretation of that rule as it applies to graphs. Accordingly, the Office will waive the requirements of 37 CFR 1.84(j) and accept graphs conforming to scientific convention (e.g., Example A).

The Office will continue to object to all other types of drawings that do not meet the requirements of the rule (e.g., flow charts, etc. See Example F, which is objectionable). Example G depicts the proper orientation of an acceptable flow chart.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
